WHAT THIS IS. One volume holding every public-web location where the exact names *Zazie Productions* or *Zazie Kanwar-Torge* are indexed, credited, quoted, embedded or linked — press, film and festival records, publications and honours, platform profiles, streaming and catalogue pages, every compilation credit, the artist's own channels, community pages, and finally the quarantined spam, scraper and SEO-poisoning material that has been attached to the name.

THE LADDER. Section order is the credibility ladder: independent editorial press at the top, recognition and film next, then industry and platform records, then compilations and community surfaces, with embed farms, auto-generated mirrors and hacked-site doorways at the very end. Inside each section, rows are re-ranked by a 0-100 credibility index shown on a coloured cell.

WHY THE SPAM IS PRINTED AT ALL. Quarantined rows are evidence of contamination: they are what a reader may find on search engines, and what needs correcting or reporting. They are included with their URLs so nothing is hidden, and marked so nothing can be mistaken for coverage.

HOW TO READ THIS VOLUME

colour is data: each cell colour encodes one ranked dimension of the record

TIER	MEANING	COUNT	WHERE IT SITS IN THE VOLUME
	A · verified institutional or independent-press record	122 links	top of the volume: institutional, award and independent-editorial records
	B · supporting platform, catalogue or trade record	197 links	trade, catalogue and platform records that support the story
	C · community, compilation or self-published context	298 links	bulk context: compilations, community pages, self-published surfaces
	D · quarantined: spam, scraper, syndication or poisoned	113 links	printed last, in the quarantine section only

CREDIBILITY INDEX — one number per row, printed on a coloured cell: 80+ deep green · 62-79 light green · 45-61 amber · 28-44 orange · under 28 red

STATUS CHIPS — printed in the last column of every row

STATUS CHIP	WHAT THE STATUS MEANS	N
LIVE	page opened during the census and the exact string was seen on it	168
IDX-OK	the name still renders inside a search-index snapshot of the page	7
PARTIAL	page reached, but the exact string only appears in a module, list or caption	6
UNCHECKED	recorded from a repository file; not opened during the most recent pass	525
DO-NOT-OPEN	quarantined compromised host — kept as evidence, never fetched	15
BROKEN	resolved and found dead (404 / parked / removed)	9
LEAD	lead only: not counted as a record anywhere in this volume	0

INTEGRITY FLAG (printed in red inside the row)	N	WHY THE ROW IS MARKED DOWN
EMBED / BACKLINK FARM	60	proxy player built to farm a backlink to one video
AUTO-GENERATED METADATA	35	algorithmically built artist/metadata page, not curated coverage
PASTE / SELF-SERVE HOSTING	22	anonymous paste or self-serve page: provenance not established
SOCIAL / FORUM MENTION	19	social or forum mention: reach without editorial review
SELF-PUBLISHED PROPERTY	18	artist- or collective-owned surface: proves existence, not third-party recognition
USER-GENERATED LIST / QUIZ / CHART	18	community list, quiz or chart: mentions rather than journalism
UNOFFICIAL FILM MIRROR	17	scraper/streamer replica of the same festival or TMDB record, not a separate placement
PAY-TO-PLAY PR WIRE	14	self-issued press-release distribution, not independent editorial
SEO DOORWAY ON HIJACKED SITE	14	injected doorway on a compromised, unrelated site using the name as bait
PAY-TO-PLAY CREDs MERCHANT	12	paid listing / cred-marketing platform: listing purchased, not awarded
ARCHIVE SNAPSHOT	6	archival snapshot of a primary record, not an independent placement
SCRAPE / MIRRORRED MUSIC DATABASE	6	auto-mirrored database entry or AI-listing clone
WIKI MIRROR	6	machine mirror of a Wikipedia list page — the underlying record is the article itself
AI ESSAY-MILL SAMPLE LIBRARY	1

APPENDIX D — HOW THIS VOLUME WAS BUILT, AND WHAT IT DOES NOT CLAIM

read this before quoting any number in the directory

SCOPE. One row per unique public-web URL on which the exact strings *Zazie Productions* or *Zazie Kanwar-Torge* were observed or recorded by the census. Repository-wide inclusion rule: a handle without the space, the French singer Zazie, Zazie Films or any other same-name entity is **not** a record; variant spellings are kept only where the source itself prints the exact string.

SOURCES MERGED FOR THIS PDF. 17 source files contributed: the curated data/master/master_index.csv (authoritative tier, category, status, date, notes), the structured sources/Zazie_Media_Master.pdf table rows (priority, publication, headline, exact-name field), the raw sources/Random_Zazie_Productions_links.pdf annotations and text lines, the 2026 Accomplishment Register docx hyperlinks, the low-trust quarantine ledger, the magazine/zine feature directory, the regional and alt-engine pass, the max-depth pass and the web-presence expansion registries (all machine-readable CSV under registry/). URLs that a registry had truncated for display were folded back into their full form rather than counted twice.

RANKING. credibility = 46 + tier weight (A 42 / B 26 / C 10 / D -34) + section weight + host-authority weight + verification-status weight + exact-name-target weight - integrity-flag penalties, then min-max mapped onto 0-100 for the coloured cell. Sections run in credibility-ladder order (independent editorial press first, quarantine last) and rows inside every section are re-ranked by the same score, so the volume reads top-down from most impressive to most spammy.

QUARANTINE. Tier D rows come from the repository's own low-trust register: hacked-site doorways, scraped clones, auto-generated metadata, paste reposts, embed farms and pirate mirrors. They are printed with their URLs so the contamination is documented and reportable; the text of those pages is never treated as information about the artist. Rows elsewhere that carry red **FLAG** text still count, but the flag states honestly what kind of placement they are (pay-to-play PR wire, self-published page, wiki mirror, archive snapshot, user quiz ...).

WHAT IS NOT CLAIMED. No exhaustiveness: print-only, private, paywalled, deleted, unindexed or region-blocked presence cannot be enumerated, so absence in this volume means "not found on the census date", never "does not exist". Inclusion proves that a public record naming the artist exists; it does **not** validate any award, review, biography or claim made by that source. Search endpoints, API probes and archive lookups are method artefacts: they appear at the bottom of this appendix and are not counted as media features.

SOURCE FILE CONTRIBUTING LINKS TO THIS VOLUME	LINKS	ROLE IN THE RANKING
master_index	619	authoritative bucket, tier, status and evidence notes for every row it holds
