

ZAZIE PRODUCTIONS · ZAZIE KANWAR-TORGE

Colour-Coded Master Directory of Media Features, Press, Film, Publications, Credits, Profiles, Mentions & Quarantined Links

Every catalogued public-web link in one ranked volume — most reputable and impressive first, most spammy last

Organised three ways: **PART I PROJECT SECTIONS** (every link about one project in one place) · **PART II FIVE READING PATHS** (P1 COMPILATIONS · P2 MAGAZINES / ZINES · P3 NEWS & MEDIA · P4 EXHIBITIONS · P5

727	727	14	14	387	121	116	172
links in the directory	unique URLs	media-type sections	subject topics	domains	tier A - strongest	tier D - quarantine	live / verified

SECTION MAP — media type, from the most impressive kind of placement to the least trustworthy

the section order itself is the credibility ladder; rows inside each section are re-ranked individually

	SECTION	LINKS	TIER SPLIT	WHAT BELONGS HERE
P	Press & Editorial	95	A 60 · B 11 · C 24 · D 0	Independent magazines, webzines, journals and news coverage: dedicated features, reviews and interviews where the artist is the subject.
P	Publications & Recognition	24	A 13 · B 5 · C 6 · D 0	Awards, honours, contest placements, institutional credit roll-pages and published writing carrying the exact name.
F	Film, Festivals & Exhibitions	52	A 32 · B 16 · C 4 · D 0	Festival selections and award citations, exhibition pages, screening listings and film-credit records.
P	Podcasts & Broadcasts	7	A 5 · B 2 · C 0 · D 0	Radio broadcasts, podcast episodes and show notes where the name is spoken or printed.
P	Profiles & Catalogs	105	A 5 · B 71 · C 29 · D 0	Artist, composer and professional profiles on industry, creative and database platforms.
M	Music Discography	1	A 0 · B 0 · C 1 · D 0	Catalogue and discography database records (label, master and release pages).
S	Streaming & Music Platforms	55	A 0 · B 46 · C 9 · D 0	Artist pages on streaming services, music-identification apps and audio catalogues.
L	Lyrics & Music Databases	1	A 0 · B 0 · C 1 · D 0	Lyrics and music-metadata database entries.
M	Music Compilations	159	A 0 · B 7 · C 152 · D 0	Compilation, netlabel and split-release appearances: one row per public listing of the credit.
O	Official Properties & Channels	50	A 6 · B 31 · C 13 · D 0	Artist-owned storefronts, channels, repositories and self-published pages. Presence proves the account exists, not third-party recognition.
C	Community, Wiki & Fan Indexes	54	A 0 · B 5 · C 49 · D 0	Wikis, fan lists, forums, quizzes, charts and community-maintained pages.
S	Search-Engine Index	3	A 0 · B 0 · C 3 · D 0	Search-engine and index surfaces holding the exact name, including redirect artefacts.
V	Video Mirror / Backlink Sites	5	A 0 · B 1 · C 4 · D 0	Video-proxy and embed surfaces that still read as ordinary listings.
S	Spam, Scraper, Syndication, SEO-Poisoning & Low-Trust	116	A 0 · B 0 · C 0 · D 116	QUARANTINE. Hacked-site doorways, scraped clones, auto-generated metadata, paste reposts and mirror farms. Recorded to document contamination and to s...

WHAT THIS IS. One volume holding every public-web location where the exact names *Zazie Productions* or *Zazie Kanwar-Torge* are indexed, credited, quoted, embedded or linked — press, film and festival records, publications and honours, platform profiles, streaming and catalogue pages, every compilation credit, the artist's own channels, community pages, and finally the quarantined spam, scraper and SEO-poisoning material that has been attached to the name.

THE LADDER. Section order is the credibility ladder: independent editorial press at the top, recognition and film next, then industry and platform records, then compilations and community surfaces, with embed farms, auto-generated mirrors and hacked-site doorways at the very end. Inside each section, rows are re-ranked by a 0-100 credibility index shown on a coloured cell.

WHY THE SPAM IS PRINTED AT ALL. Quarantined rows are evidence of contamination: they are what a reader may find on search engines, and what needs correcting or reporting. They are included with their URLs so nothing is hidden, and marked so nothing can be mistaken for coverage.

HOW TO READ THIS VOLUME

colour is data: each cell colour encodes one ranked dimension of the record. Three parts, one corpus: PART I by PROJECT, PART II by REQUESTED THEME, PART III by MEDIA TYPE

PART	WHAT IT IS	HOW TO USE IT
I	Project sections — by the thing the links are about	102 sections. A broadcast commission, a compilation, an anthology, a film, an exhibition or a press wave: its own page first, then catalogue records, distribution mirrors, media, press, events, references, benign mirrors and archive snapshots — and last, walled off, the scraped copies of the same project. Every row still carries its \$ and rank so it can be found in PART III.
II	Reading paths — the requested thematic cuts	P1 netlabel + compilation features · P2 magazine / zine features · P3 news articles & media coverage · P4 exhibitions, galleries & festival recognition · P5 literary publications & writing. Complete for each theme.
III	Media-type sections 1-14 — the full corpus by kind of placement	Press & editorial, publications & recognition, film & festivals, podcasts, profiles, discography, streaming, lyrics databases, compilations, official channels, community indexes, search-engine index, video mirrors and the quarantine bucket. Rows ranked by the credibility index inside every section.

TIER	MEANING	COUNT	WHERE IT SITS IN THE VOLUME
	A · verified institutional or independent-press record	121 links	top of the volume: institutional, award and independent-editorial records
	B · supporting platform, catalogue or trade record	195 links	trade, catalogue and platform records that support the story
	C · community, compilation or self-published context	295 links	bulk context: compilations, community pages, self-published surfaces
	D · quarantined: spam, scraper, syndication or poisoned	116 links	printed last, in the quarantine section only

CREDIBILITY INDEX — one number per row, printed on a coloured cell: 80+ deep green · 62-79 light green · 45-61 amber · 28-44 orange · under 28 red

95+	85+	75+	65+	55+	45+	35+	25+	15+	5+
-----	-----	-----	-----	-----	-----	-----	-----	-----	----

STATUS CHIPS — printed in the last column of every row

STATUS CHIP	WHAT THE STATUS MEANS	N
LIVE	page opened during the census and the exact string was seen on it	165
IDX-OK	the name still renders inside a search-index snapshot of the page	7
PARTIAL	page reached, but the exact string only appears in a module, list or caption	6
UNCHECKED	recorded from a repository file; not opened during the most recent pass	525
DO-NOT-OPEN	quarantined compromised host — kept as evidence, never fetched	15
BROKEN	resolved and found dead (404 / parked / removed)	9
LEAD	lead only: not counted as a record anywhere in this volume	0

INTEGRITY FLAG (printed in red inside the row)	N	WHY THE ROW IS MARKED DOWN
EMBED / BACKLINK FARM	67	proxy player built to farm a backlink to one video
AUTO-GENERATED METADATA	56	algorithmically built artist/metadata page, not curated coverage
PASTE / SELF-SERVE HOSTING	42	anonymous paste or self-serve page: provenance not established
UNOFFICIAL FILM MIRROR	38	scraper/streamer replica of the same festival or TMDb record, not a separate placement
USER-GENERATED LIST / QUIZ / CHART	35	community list, quiz or chart: mentions rather than journalism
SOCIAL / FORUM MENTION	30	social or forum mention: reach without editorial review
PAY-TO-PLAY CREDITS MERCHANT	24	paid listing / cred-marketing platform: listing purchased, not awarded
SELF-PUBLISHED PROPERTY	23	artist- or collective-owned surface: proves existence, not third-party recognition
PAY-TO-PLAY PR WIRE	20	self-issued press-release distribution, not independent editorial
SEO DOORWAY ON HIJACKED SITE	19	injected doorway on a compromised, unrelated site using the name as bait
SCRAPE / MIRRORED MUSIC DATABASE	12	auto-mirrored database entry or AI-listing clone

INTEGRITY FLAG (printed in red inside the row)	N	WHY THE ROW IS MARKED DOWN
WIKI MIRROR	8	machine mirror of a Wikipedia list page — the underlying record is the article itself
ARCHIVE SNAPSHOT	7	archival snapshot of a primary record, not an independent placement
AI ESSAY-MILL SAMPLE LIBRARY	3	

DASHBOARD — what the census actually contains

all counts are of unique URLs after de-duplication, truncation-collapse and quarantine re-bucketing

CONTENTS

PART I groups the 727 links by the PROJECT they belong to — one section per commission, compilation, anthology, film, exhibition or press wave, its own page first and its scraped copies last. PART II holds the five requested thematic reading paths; PART III is the media-type directory whose fourteen sections run from the most reputable kind of placement to the quarantine bucket; the four appendices re-sort every one of the 727 links by domain, by subject, by quarantine cluster and by method.

	PART I · Project sections — links grouped by the project they belong to	102 projects, one section each: every link about a commission, a compilation, an anthology, a film, an exhibition or a press wave in one place, from its own page to its scraped copies		page 7
I	PART I · Projects with one link, and what is not a project	the register rows too thin to be a section, plus a note on the links that describe the artist rather than one project		page 66
II	PART II · The five headline reading paths	the requested thematic cuts of the whole corpus, complete and ranked		page 67
III	PART III · Media-type sections 1-14	the full corpus by kind of placement, credibility-ranked inside each section		page 94

A	Appendix A · Complete alphabetical link register	every one of the 727 links in one alphabetical run, two per row		page 194
B	Appendix B · Topic & subject cross-index	the same corpus re-cut by what each record is about, with its best rows		page 206
C	Appendix C · Quarantine map by domain	the 116 quarantined rows grouped by the domain that poisoned them		page 209
D	Appendix D · Method, provenance & limits	how the census was built and scored, engines used, and what it does not claim		page 212

PART I · PROJECT SECTIONS — one section per project, not per media type

102 projects carry more than one catalogued link; they gather 398 of the 727 links in this volume. Each section runs from the project's own page to the scraped copies of it, and every row keeps its media-type rank (§) so it can still be found in PART III.

123 projects in the register · 325 links belong to the artist rather than to one project

HOW TO USE THIS PART. If you are looking for everything about one thing — the Black Mountain College commission, a compilation a track appeared on, an anthology that ran a story, a film and its festival run — read the section for that project instead of hunting through fourteen media-type sections. The role band above each group of links says what kind of page it is; the tier, credibility and status columns are the same colour code as everywhere else in the volume; § and the small number are the row's home section and rank in PART III. Quarantined groups are printed last, inside their own project, because that is where a reader will actually meet them: they are what search engines return for these names, and they are never evidence of coverage.

PROJECT INDEX — every project section in this part, largest first: use it to jump straight to a project instead of scanning the volume.

PROJ 02 BMC RADIO ART — Black Mountain College Museum + Arts Center
commission

Radio commission · 2021 — The full commission record: the museum’s own announcement pages, the commissioned radio work as carried by every podcast directory that distributes BMC Radio, the Listen Notes show-notes mirror, the Wayback capture and the listening-session listing — and, clearly separated at the end, the hacked-site doorway spam that injects the museum’s name.

22 links · A 9 · B 1 · C 2 · D 10 · live 1 · 10 quarantined

Artist credit: Commissioned radio artist — the 30-minute work “Cheaper Impressions”, broadcast, episode bio and listening session **Start here:** <https://www.blackmountaincollege.org/broadcast-bmc-radio-artist-zazie-productions> **Roles in this section:** project page 2 · distribution / listen 8 · event / screening 1 · archive snapshot 1 · quarantine — do not cite 10

WHAT SITS OUTSIDE THE PROJECTS. 325 of the 727 links describe the artist rather than one project: platform profiles and streaming pages, the artist's own Bandcamp catalogue, press pages about the artist as a whole, community and quiz pages, and the scrapers that assemble an artist page from metadata. They are not forced into a project here — a project section means a link is about that thing — and they remain in full in PART III (their media-type sections) and in Appendix A. 13 links legitimately appear in more than one project (a screening programme and the film it carried, a magazine feature and the issue it ran in); each occurrence keeps its own role band, and the alphabetical register in Appendix A still lists every URL once.

FIVE HEADLINE READING PATHS

the master directory is organized by media type; these five paths re-cut the same 727 records into the requested themes — netlabel + compilation features, magazine / zine features, news articles & media, exhibitions & art galleries, literary publications & writing. Each path is COMPLETE for its theme and ranked from the most reputable and impressive placement to the least. Every row below also appears with full evidence notes in the numbered section named in its banner.

523 path rows (with overlap) · 727 unique links in the volume

PATH P2 · MAGAZINE / ZINE FEATURES

Dedicated features, reviews, interviews and profiles about the artist in independent magazines, zines and journals — the Phase-4 magazine/zine census pass united with every major press feature on record.

62 links · A 31 · B 9 · C 21 · D 1 · live 16

complete ranked cut for this theme — most reputable and impressive first. The bold number is the position inside this path; the small *vol* number under it is the row's rank in the whole volume; CRED is the 0-100 credibility index. Full evidence rows for these links: §1 **Press & Editorial** (page 94); quarantined rows are expanded again by domain in Appendix C.

APPENDIX D — HOW THIS VOLUME WAS BUILT, AND WHAT IT DOES NOT CLAIM

read this before quoting any number in the directory

SCOPE. One row per unique public-web URL on which the exact strings *Zazie Productions* or *Zazie Kanwar-Torge* were observed or recorded by the census. Repository-wide inclusion rule: a handle without the space, the French singer Zazie, Zazie Films or any other same-name entity is **not** a record; variant spellings are kept only where the source itself prints the exact string.

SOURCES MERGED FOR THIS PDF. 19 source files contributed: the curated data/master/master_index.csv (authoritative tier, category, status, date, notes), the structured sources/Zazie_Media_Master.pdf table rows (priority, publication, headline, exact-name field), the raw sources/Random_Zazie_Productions_links.pdf annotations and text lines, the 2026 Accomplishment Register docx hyperlinks, the low-trust quarantine ledger, the magazine/zine feature directory, the regional and alt-engine pass, the max-depth pass and the web-presence expansion registries (all machine-readable CSV under registry/). URLs that a registry had truncated for display were folded back into their full form rather than counted twice.

RANKING. credibility = 46 + tier weight (A 42 / B 26 / C 10 / D -34) + section weight + host-authority weight + verification-status weight + exact-name-target weight - integrity-flag penalties, then min-max mapped onto 0-100 for the coloured cell. Sections run in credibility-ladder order (independent editorial press first, quarantine last) and rows inside every section are re-ranked by the same score, so the volume reads top-down from most impressive to most spammy.

PROJECT SECTIONS (PART I). The corpus is also re-cut by PROJECT rather than by media type, so that the links about one thing can be read together. The rule set is a curated register, registry/project_sections/projects.csv (one row per project: aliases, exclusions, canonical hosts, URL pins), read by scripts/build_project_sections.py, which also derives one project per compilation in the listen-link table. Matching is deliberately conservative and deterministic — a phrase must appear in the URL or the record title, or the record must be pinned to the project by a documented URL — never by fuzzy similarity, so a project section can be audited from the register alone. Inside a section every link is classified by role (project page, artist credit, catalogue record, distribution/listen, media/embed, press, event, reference, mirror, archive snapshot, quarantine) and quarantined rows are grouped last. 398 links belong to a multi-link project, 21 to a project with a single found page, and 325 to no project at all (artist-level profiles, streaming pages, catalogues, community pages and metadata scrapers — they describe the artist, not one project). 13 links legitimately appear under more than one project; Appendix A still prints each URL once. The project view is a reading aid built on top of the same records: it changes no tier, no status and no credibility score.

QUARANTINE. Tier D rows come from the repository's own low-trust register: hacked-site doorways, scraped clones, auto-generated metadata, paste reposts, embed farms and pirate mirrors. They are printed with their URLs so the contamination is documented and reportable; the text of those pages is never treated as information about the artist. Rows elsewhere that carry red **FLAG** text still count, but the flag states honestly what kind of placement they are (pay-to-play PR wire, self-published page, wiki mirror, archive snapshot, user quiz ...).

WHAT IS NOT CLAIMED. No exhaustiveness: print-only, private, paywalled, deleted, unindexed or region-blocked presence cannot be enumerated, so absence in this volume means "not found on the census date", never "does not exist". Inclusion proves that a public record naming the artist exists; it does **not** validate any award, review, biography or claim made by that source. Search endpoints, API probes and archive lookups are method artefacts: they appear at the bottom of this appendix and are not counted as media features.

SOURCE FILE CONTRIBUTING LINKS TO THIS VOLUME	LINKS	ROLE IN THE RANKING
master_index	616	authoritative bucket, tier, status and evidence notes for every row it holds
data/master/master_index.csv	610	same canonical index read by the CSV harvester (deduplicated with master_index)
link_dump_pdf	316	raw research dump: adds links the curated master never kept, and is where the quarantine material starts
registry/seed/seed_unique_urls.csv	254	registry pass file: corroborating links, evidence notes and re-tiering
media_master_pdf	133	supplies Priority A/B/C, dates and publication headlines for the verified 133-record master
data/master/listen_links.csv	111	one listen link per compilation credit — fills the music-compilations section
registry/spam_scraper_syndication_lowtrust_2026-09-05/lowtrust_ledger.csv	85	registry pass file: corroborating links, evidence notes and re-tiering
registry/regional_alt_engine_pass_2026-09-05/candidate_ledger.csv	27	registry pass file: corroborating links, evidence notes and re-tiering
registry/regional_alt_engine_pass_2026-09-05/source_access_log.csv	27	registry pass file: corroborating links, evidence notes and re-tiering
registry/web_presence_expansion/discoveries.csv	25	registry pass file: corroborating links, evidence notes and re-tiering
registry/magazine_zine_features/source_access_log.csv	21	registry pass file: corroborating links, evidence notes and re-tiering
registry/magazine_zine_features/duplicate_map.csv	20	registry pass file: corroborating links, evidence notes and re-tiering
registry/magazine_zine_features/feature_directory.csv	19	registry pass file: corroborating links, evidence notes and re-tiering
registry/magazine_zine_features/visibility_matrix.csv	19	registry pass file: corroborating links, evidence notes and re-tiering
